

## decosept®

Your hands can work wonders

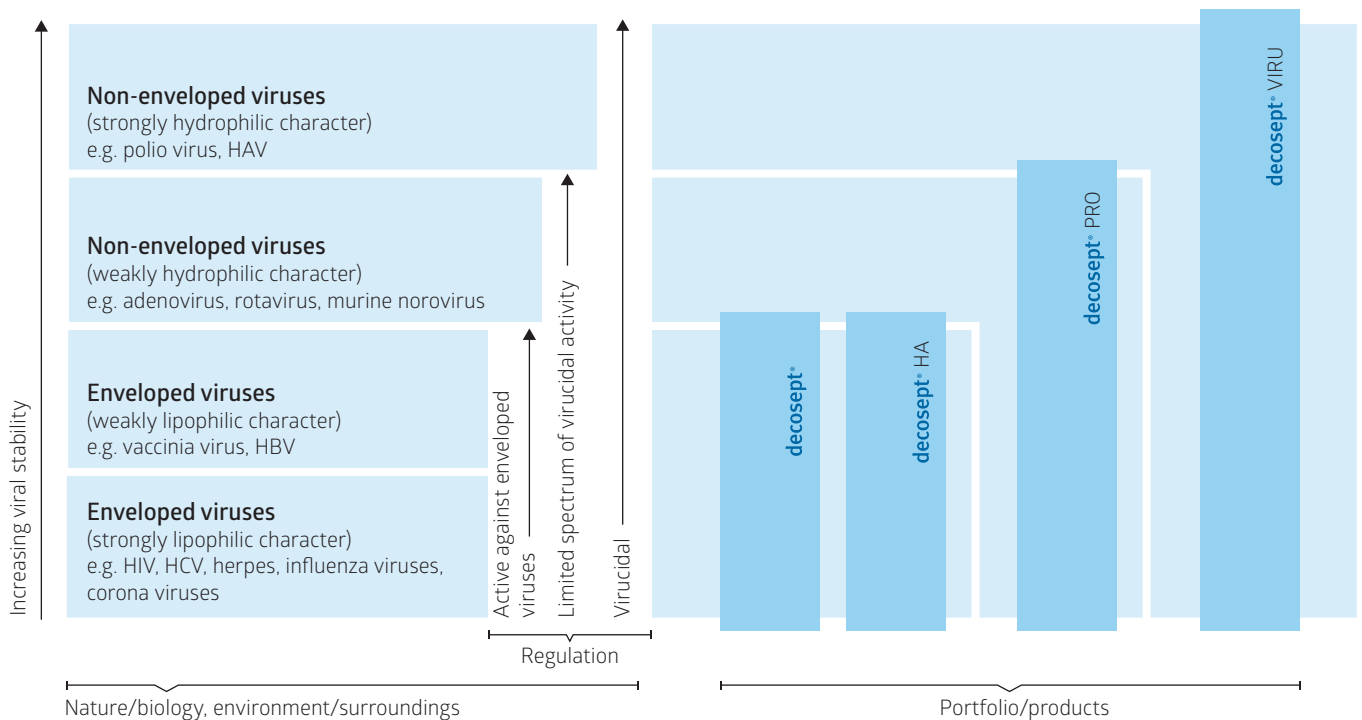

Demand the highest standards for their hygiene

# Hygiene means safety. Safety means trust.

## Cascade of effectiveness

The cascade of effectiveness illustrates which decosept® product is best suited for which application.

Source based on J. Steinmann: Virus-Wirksamkeit der hygienischen Händedesinfektion. HygMed 2009;34.

All of our quality-checked hand disinfectants are:

- ✓ tested according to EN 1500 / EN 12791, making them suitable for hygienic and surgical hand disinfection
- ✓ alcohol-based and contain a balanced skin care complex
- ✓ effective against bacteria and viruses
- ✓ required contact times and spectra of activity are clearly defined and proven
- ✓ VAH-certified and IHO-listed

## Demand compliance in hand hygiene

Numerous studies show that over 80% of all infections are transmitted via hands. Hand disinfection is the most effective way of reducing pathogens and is therefore considered the most important preventative measure. When hand disinfection is used correctly and consistently, a large number of infection transmissions can be avoided.

Following the 6 vital steps for safe hand disinfection helps you to protect yourself and others.

## Innovative and hygienically safe

Choosing the right dispenser is just as important as using a safe and skin-friendly hand disinfectant to encourage widespread acceptance among users. Equally crucial is the reliability and function of the dispenser chosen, as well as ensuring optimal positioning at the point of care.

Our range includes not only the tried-and-tested decosept® hand disinfection products with skin care complex, but also a wide range of dispensers for all areas of use. The requirements-based choice of dispenser helps to ensure maximum protection against viruses and other infectious diseases.

## Advantages for your institution

With focus on hand hygiene as part of a company-wide hygiene concept, companies are able to offer their employees a health-orientated and hygienic working environment. These are the safest and most cost-efficient measures for reducing the spread of infectious diseases.

When implemented correctly, hand hygiene reduces corporate risk and improves the satisfaction of your workforce. We can help you achieve this with our decosept® range of products.

## The specialists in cleaning and disinfection

### Competence and innovation – worldwide

We have been researching, developing and manufacturing products in Switzerland for demanding applications in the field of cleaning and disinfection since 1965. Our deconex® and decosept® branded products are used in the industrial sector, in hospital hygiene, in laboratories, in the pharmaceutical sector and in hand and surface disinfection. We distribute our products worldwide through a network of subsidiaries and distribution partners.

### decosept® products:

#### highly effective, caring hand disinfection

We want to fight diseases and infections before they develop. The products in our decosept® hand disinfection range have proven themselves for more than 30 years thanks to their pioneering and skin-caring properties in a wide range of applications. All of the products satisfy today's high requirements in terms of professional hand disinfection, without compromise.

### deconex® portfolio: Surface disinfection range

The effective disinfection of surfaces is an essential part of infection prevention. When developing and manufacturing our deconex® products, we place maximum emphasis on quality and efficacy. As expert advisers, we support our customers in selecting the right products for their requirements and using them correctly.
