

## DRUMTAINER – The mobile and secure transport and storage system for products in 200 liter drums.

The DRUMTAINER is a mobile drum-in-drum system for the quick and easy transport of cleaning concentrates in 200 L containers. The primary use is associated with concentrate conveyor systems (CCS).

### Advantages

- + Quick and easy transport
- + Increased workplace safety
- + Maximum cost-effectiveness
- + Complete emptying, depending on the CCS design
- + Safe + clean storage
- + Hygienic
- + Space-saving
- + Environmentally friendly

# DRUMTAINER - hygienic, economical, space-saving.

## Safety at work

Heavy lifting and transport can cause occupational health problems. The DRUMTAINER can – even though it contains a 200 L container – be easily handled by one person. This not only increases safety at work, but also reduces demands on the internal logistics services.

## Hygiene aspects

Where earlier a spill containment with grate was placed, today stands the DRUMTAINER. The simple handling ensures quick and easy cleaning and disinfection of the standing area.

## Cost-effectiveness

Accessories such as drum trolleys, pallet jacks, forklifts and loading ramps are a thing of the past when transporting the DRUMTAINER. The same applies to a space-consuming and difficult-to-clean spill containment, as the DRUMTAINER acts as such in case of an accident. The specific tilt of the drums also facilitates better emptying and there-

fore maximum product utilisation. A plus for both cost-effectiveness and the environment.

## Technical data

The DRUMTAINER is made of high quality, impact resistant, shatterproof and non-corrosive plastic.

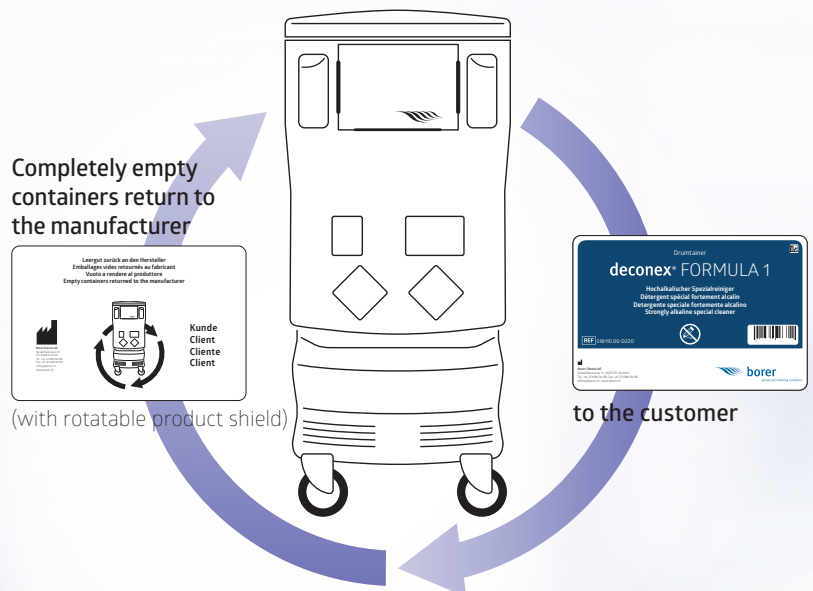

The dimensions have been adapted to the common dimensions of doors, lifts and EUR-pallets. Four large castors, ergonomic handgrips and a push bar make the DRUMTAINER convenient for manual handling.

**Dimensions:** 605 x 800 x 1360 mm (WxDxH)

**Volume:** 400 liters

**Weight empty:** 34 kg

**Max. load:** 300 kg
