

Hygienic hand disinfection in 30 seconds

Standard rub method according to EN 1500

decosept®

1

Rub palms together, including wrist.

2

Left palm over back of right hand and right palm over back of left hand.

3

Palm to palm with fingers interlaced.

4

Place palms together, thumbs opposed. Clasp hands and rub.

5

Wrap left hand around right thumb and rub while twisting, repeat with right hand and left thumb.

6

Put left fingertips together, place in right palm and rub using circular motion. Repeat with other hand.

Please note

- Dispense decosept® onto dry palms
- Carry out each step 5 times
- Rub in firmly for 30 seconds
- If necessary, add a further dose of decosept® to the cupped hand
- Make sure hands remain moist during the entire rubbing time
